

WE REFUSE

Electro-polluting meters

Hydro-Quebec plans to install 1.7 million "smart" meters by the end of 2014 in Montreal, Laval as well as on the North & South shores.

These new meters seriously jeopardize our **economy, health, security, environment & right to privacy.**

They constantly emit potentially carcinogenesis microwaves known to cause symptoms such as insomnia, migraines, chronic fatigue, tinnitus, heart palpitations, dizziness & more.

Its not too late to stop this senseless project!

Each of you can stand up against it by taking part in our letter campaign, signing the petition, joining a local group and much more... Other ways to take action are listed on our site.
